

Sniff'n'Stop®

Fends Off Pests in Street Lights

Coated sponge is inserted into support arm...

...die cut to fit over wires.

"It's working so well that we haven't had to return to any lights treated with it," says Kevin Walker, Lineman for Gainesville Regional Utilities. There was none of the usual squirrel damage and not even a bug inside. "You could eat off the inside of the globe."

Sniff'n'Stop® keeps away those pests that can destroy a light or bugs which reduce the efficiency of the luminescence.

- Patented time-released odorant
- Works on animal's advanced sense of smell. They sniff, stop and go away.
- Long-lasting protection
- Safe for humans and animals
- Environmentally-friendly

Sniff'n'Stop deters snakes, rats, wasps, spiders, squirrels, fire ants and other wildlife by emitting an odor they can smell (and hate), but humans can't.
